BACKGROUND

👤 ABOUT

I've been into technology for as long as I can remember. One could always find me tinkering with some device, finding out how things work, and seldom electrocuting myself. I found the internet fairly late in my life, and have been blown away by the possibilities it brings ever since. I find the idea of me being able to contribute to the growth of this living organism fascinating, and it really gives drive to what I do. Recently I have been working mostly within the React ecosystem and the amazing tooling that surrounds it.

🏢 WORK EXPERIENCE

Javascript Web Developer, 7 West Media

Aug, 2016 - Current   🕐 6 months

Worked in the digital department of 7 West Media. I was hired as a mid level Javascript developer, specializing in React.js. I worked on the tail-end of the Rio 2017 olympics project, and through the whole Australian Open tennis project.

- Worked with a Universal React.js technology stack.
- Had a major contributon in setting up development process of the Web team.
- Integrated with a complex backend.
- Worked with a variety of modern web video and advertising technologies.
- Was a major contributor in Australian Open Tennis project (most commits, PRs and LOC).

- Helped the digital team in transitioning towards an agile software development methodology.

Software Engineer, Learnosity
Jul, 2015 - Aug, 2016   🕐 12 months

Learnosity provides online education assessment solutions. I was hired here as a junior level web-developer, and quickly became a productive member of the team. In Learnosity I was responsible for Front-end web development, working on a Backbone.js based stack with a large team of great developers.

- Mastered advanced Git workflows.
- Worked with a mix of Backbone.js, jQuery and ES6.
- Was one of the leading developers in implementing accessibility.
- Worked in a micro-service oriented environment.
- Worked with Jasmine, Mocha, Webdriver.io for testing.
- Learned to work with large teams of developers with varying skill levels.

Web Developer, Datarati Pty Ltd
Nov, 2014 - Jul, 2015   🕐 8 months

Datarati is one of the leading Marketing Automation agencies. I was hired here as an entry level web-developer, and very quickly developed my skillset to match and exceed the workplace requirements. In Datarati I was responsible for developing HTML emails, landing pages, working with the senior developers to design and build integrations of REST and SOAP APIs, and, Node.js apps.

- Worked with Git daily.
- Mastered responsive HTML Emails.
- Assisted in developing and testing multiple Node.js apps.
- Learned unit testing and TDD.
- Conducted thorough cross-browser and cross-client testing.
- Worked with leading marketing automation platforms.

IT Engineer, Telekonta
Jul, 2013 - Mar, 2014   🕐 8 months

Telekonta is one of the biggest telecommunication companies in Lithuania. Working as an IT Engineer I was responsible for installation, deployment, and maintenance of telecommunication and networking systems, system integration, and training. In this role I've formed the core of my knowledge on the integration of systems hardware, and gained a strong understanding of networking concepts.

- Managed deployment of a complete networking system on a 4 story building.
- Took part in deployment of a coast guard radiolocation and surveilance system.
- Coordinated training of staff of 20 people in usage of the said system.

</> SKILLS

Web Development
